

Mt Bevin Expedition

Friends and Family Electronic Newsletter

December 2014, Issue 1

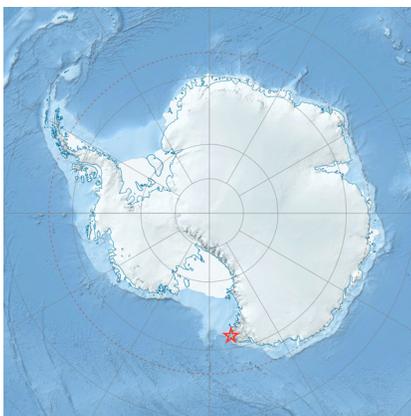

Welcome

Welcome aboard and please join us as we journey to the summit of Mt Bevin.

The Expedition effort is just getting started and we have a long way to go. We are a small and eager team of mountaineers working on a high-level plan and transport options. It will be a few years before the climbing starts.

Along the way we will send out this electronic newsletter to let all our Friends and Family know what we are up to and the progress we are making.

Mt Bevin (3,490m)

Named after Tony Bevin, this little and remote mountain is located at 71°54'S and 169°27'E very near Cape Adare in Antarctica.

Read more about Mt Bevin on our website blog.

Antarctic Transport

One of the more important and challenging aspects of the expedition will be getting to and from the ice **safely**. Sailing in the Southern Ocean is serious business.

The search for a suitable ice-class expedition vessel is well underway. The current plan and hope is to charter a vessel for the 2016/2017 austral summer. More on Antarctic Transport once we have secured the vessel.

Expedition Artist

Ros Bevin, graphic artist and niece of Tony Bevin, will design the logo for the Expedition. The logo will be proudly displayed online and on our clothing. We need to make sure we look good on the mountain!

We're Online!

That's right, we have a website and facebook (see links below). Please follow along with us.

Get Involved

Want to get involved with the expedition effort or want to share a great idea? Send an email to info@mtbevin.com

A word from the Expedition Patron

It is indeed an honour to be asked to be patron of this singular event. I am not aware if any other peaks in this region of the Antarctic have been climbed specifically to honour the person the peak was already named for. I also believe that, as this mountain is in a relatively unexplored area of Antarctica, it would not have been climbed before.

I am impressed by the quality and experience of the climbing and support team being assembled by Stephen and Caroline, and delighted that it is becoming something of a family affair with the involvement of other close relatives of mine.

Being in the Antarctic, it will be a test of climbing and ice skills and of logistics, but that is what high altitude mountaineers are inspired by, and Stephen and his team bring extensive experience and past successes to this challenge. My best wishes and encouragement go with the team on this event.
